wood polymer composites

## WPC MARBLES & LAMINATES

### WPC GLOSS MARBLES:

WPC Marble is a unique product brought up and promoted by **HARDYPLAST** in India. Made with a solid compound of PVC and Calcium carbonate it gives structure a stone like strength. This can become a replacement product for marbles and stones for Wall cladding applications. We will cater stone industry with this product with various designs of Italian natural marble. Thickness of WPC Marble will be 4 mm.

### Fixing method for WPC Marbles:

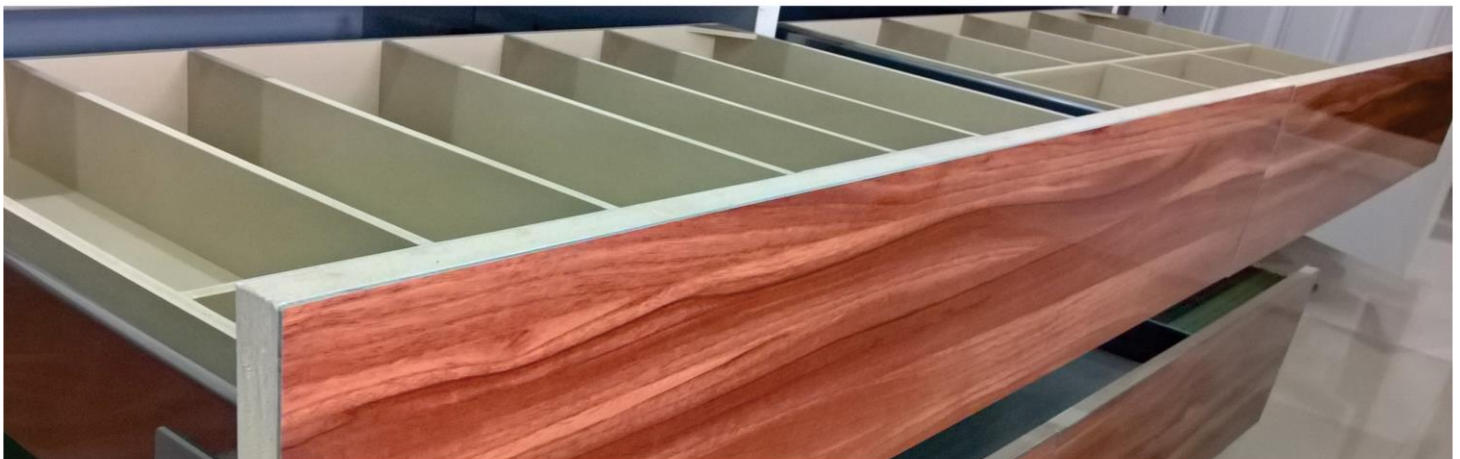

Apply WPC Marble with Synthetic Rubber based Glue for applying it to Plywood, Painted wall and MDF. Usually practice is to prepare a frame structure on wall where we need to clad WPC Marble. You can use 8 mm or 12 mm Plywood in 3 inch cut strips and fix them to wall with screw. Apply Synthetic Rubber based adhesive on the back side of WPC Marble as well on Plywood surface. Hold it with Abro gripping tapes and open it after 6 hours of time. Your wall is ready with beautiful marble designs.

### WPC GLOSS LAMINATES

WPC Laminates are a unique product brought up and promoted by **HARDYPLAST** in India. Made with a solid compound of PVC and Calcium carbonate it gives surface a stone like strength in high gloss and satin finishes. This can become a replacement product for High pressure laminates and High gloss PU coating in furniture shutter surface applications. We will cater furniture industry with this product with various designs of wood grains and Italian natural marble. Thickness of WPC Laminate will be 1.5 mm.

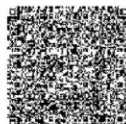

### Fixing Method for WPC Laminate:

Kitchen or wardrobe shutter made with WPVC sheet can be applied WPC Gloss Laminate with SR (Synthetic rubber) based glue as the fastest method. Shutters made with Plywood or MDF can be applied with Synthetic Rubber based glue for fixing this laminate.
